21909

SCREW-IN ORBITER MINI-HALOGEN SWIVEL LIGHT EXTENDERS

21914

21915

One Light Mini-Halogen

21905: 5" Stem, 9-3/8" O.L.

21908: 8" Stem, 12-1/2" O.L.

21911: 11" Stem, 15-1/2" O.L.

Mini-Halogen shade & swivel dimensions: Length 3"; Width 1-1/2"

Two Light Mini-Halogen

21906: 5" Stem, 9-3/4" O.L.

21909: 8" Stem, 12-7/8" O.L.

21912: 11" Stem, 15-7/8" O.L.

One Light Orbiter

21914: 11" Stem, 16-3/4" O.L.

Orbiter shade & swivel dimensions: Length 4-1/8"; Width 3-3/16"

Two Light Orbiter

21915: 11" Stem, 17-1/8" O.L.

Lamps: Use 50 Watt ES-16 or 75 Watt ES-20 (GU or GZ-10 Base)

Line Voltage Halogen Reflector Lamps (lamps not included)

50 Watt ES-16

Type

75 Watt ES-20

99001 25° Narrow Flood GU-10

99003

99002 50° Wide Flood GU-10

99004

Specify Color: (AL) Silver Aluminum, (BK) Black, (WH) White

Accessory: Close-Up Cover Plate 29010 (8" dia.) or **29011** (6" dia.)

Use with 5", 8" or 11" stem Extender models to cover recessed fixture opening.

LINE VOLTAGE MR-16 STYLE MINI-HALOGEN SCREW-IN LIGHTS

With a simple turn of your wrist, existing rigid fixtures or recessed down lights convert to latest lamp technology utilizing miniature line voltage halogen lamps that fit today's trend for smaller size, less obtrusive lighting. Orbiter & Mini-Halogen lights are instantly adjustable. Easily place illumination in any direction needed.

Swivelier Extender units are compact. They do not require a costly low voltage transformer and are fully dimmable with a standard incandescent dimmer.

The Mini-Halogen lights give you precise beam control and a warm color temperature of 2750K. Use 50 watt ES-16 or 75 watt ES-20 (aluminized) lamps; or ESD-16 or ESD-20 (dichroic) lamps. These lamps utilize a "W" design filament for optical efficiency and long lamp life.

Swivelier Mini-Halogen lights screw into a medium base socket and convert socket to accommodate GU or GZ-10 base lamps. The male screw in base features a built-in ratchet mechanism that prevents over tightening of lamp.

Swivelier's patented spring tension swivel rotates a full 360° and angles 90°. The swivel socket stays put without levers or set screws. A touch of the finger puts the light in any direction you desire for maximum flexibility.
