## SCREW-IN LITE-FLEX SWIVEL SOCKET EXTENDERS & TORPEDO SHADE EXTENDER

### One Light Screw-In

L21705: 5" Stem, 9-3/8" L, 8-3/8" Ext.  
L21708: 8" Stem, 12-1/2" L, 11-1/2" Ext.  
L21711: 11" Stem, 15-1/2" L, 14-1/2" Ext.

### Two Light Screw-In

L21706: 5" Stem, 9-3/4" L  
L21709: 8" Stem, 12-7/8" L  
L21712: 11" Stem, 15-7/8" L

### Torpedo Shade Screw-In

22072: 11" Stem  
Shade & Swivel: L: 8-1/2", W: 5-5/8"

Lamps: Up to 150 Watt PAR-38 Halogen Reflector Lamps (lamps not included)

Specify Color: (BK) Black, (WH) White

Accessory: Close-Up Cover Plate 29010 (8" dia.) or 29011 (6" dia.)

Use with 5", 8" or 11" stem Extender models to cover recessed fixture opening.

Socket Extenders easily screw into an existing medium base socket and allows you to extend lamp position. Extension dimension is the extended length you can extend lamp straight down.

## SCREW-IN LIGHTS

With a simple turn of your wrist, existing rigid fixtures or recessed down lights become instantly adjustable. Easily place illumination in any direction needed.

Swivelier light extender units are the easiest and most economical means of converting recessed fixtures into an adjustable light source. Socket Extenders simply screw into an existing medium base socket to extend lamp position. The male screw in base features a built-in ratchet mechanism that prevents over tightening of lamp.

Swivelier's patented spring tension swivel rotates a full 360° and angles 90°. The swivel socket stays put without levers or set screws. A touch of the finger puts the light in any direction you desire for maximum flexibility.
