Suggested Lamps: Use up to 50 Watt MR-16 Halogen reflector 12 volt lamps with front glass lens and aluminized reflector. (lamps not included)

Specify Color: (WH) White

LOW VOLTAGE TRACK LIGHTS FOR ONE & TWO CIRCUIT LITESTRIP PRO TRACKS

Architectural, commercial specification grade low voltage halogen lamp track lights utilize miniature low voltage halogen lamps that fit today's trend for smaller size, less obtrusive lighting. Easily place light illumination in any direction needed.

Low profile track adapter fits Litestrip PRO one circuit or two circuit track. Adapter circuitry easily switched in the field to operate on either circuit. Built-in 75 watt electronic transformer converts 120 volt line voltage to 12 volts. Transformer is fully dimmable with a standard incandescent dimmer.

Track light adapter attach mechanically and electrically along track. Visual polarity lines assures proper electrical connections.

Use MR-16 Halogen lamps for precise beam control.

Mini MR-16 unit features all metal construction. Wiring is concealed within Swivelier's patented spring tension swivel that rotates a full 360° and angles 90°. The swivel socket stays put without levers or set screws. A touch of the finger puts the light in any direction you desire for maximum flexibility.

MR-16 Gimbal Ring unit features a spring tension half yoke swivel that rotates 350° and angles 90°. External wires enclosed in a fiberglass sleeve.

Porcelain lamp holder.
