Finish: (AL) Silver Aluminum, (BK) Black, (BZ) Bronze, (WH) White

OUTDOOR LIGHTS

Bullet back outdoor series is ideal for commercial and residential applications using up to 150 watt PAR-38 flood or spot reflector lamps.

Ideal for general illumination and security lighting. Use to illuminate walks, buildings, entrance ways, driveways, parking areas, under eaves, trees, outdoor landscaping, signs, and sculptures.

MATERIAL:

Shade is made of high quality heavy gauge aluminum. Canopy models have a 5-3/16" diameter, 7/8" deep rigid steel canopy and mounting strap for attachment to 3" or 4" outlet boxes. Threaded stem model provided with 1/2 NPT stem. All units provided with pre-stripped wire leads.

GASKETING:

Sockets and canopy provided with sealing gaskets for complete weatherproofing.

ADJUSTMENT:

Spring tension top mounted swivel for ease of adjustment with built-in "stops" to prevent twisting of wires. Swivelier swivel rotates a full 360° and angles to 90°.

ELECTRICAL:

This fixture operates on 120V current. All wiring meets, or exceeds necessary gauge requirements. For added safety all connections are made internally to eliminate shock hazard. The medium base porcelain socket is rated 660W-250V.

OPTIONAL:

Consult factory to modify units for using Metal Halide lamps, or for 250 watt halogen lamps.
