23960: Single for Swivelier LiteStrip Single Circuit Track

24960: Single for Swivelier Star*Track Three Circuit Track

Torpedo Shade & Swivel Dimensions: Length 8-1/2", Width 5-5/8"

Lamps: Up to 150 Watt PAR-38 Halogen

Finish: (AL) Silver Aluminum, (BK) Black, (WH) White

Classic bullet back styling of the Torpedo Shade series makes this fixture type ideal for commercial applications using up to 150 watt PAR-38 reflector lamps.

Ideal for areas of high foot traffic, in theaters, churches, for accent lighting, or general illumination.

MATERIAL:

Shade is made of high quality heavy gauge aluminum. Canopy models have 5-3/16" diameter, 7/8" deep rigid steel canopy and mounting strap for attachment to 3" or 4" outlet boxes. Threaded stem model provided with 1/4-18 male NPS threaded stem, wire leads, lock washer and lock nut. Track models provided with track adapter made of high impact, heat resistant plastic.

ADJUSTMENT:

Spring tension top mounted swivel for ease of adjustment with built-in "stops" to prevent twisting of wires. Swivelier swivel rotates a full 360° and angles to 90°.

ELECTRICAL:

This fixture operates on 120V current. All wiring meets, or exceeds necessary gauge requirements. For added safety all connections are made internally to eliminate shock hazard. The medium base porcelain socket is rated 660W-250V.

OPTIONAL:

Consult factory to modify units for use with Metal Halide lamps; for 250 watt halogen lamps; or with 660W-600V socket for use on 277 volts.
