One Light Smart-Cone

22605: 5" Stem, 11" O.L.

22608: 8" Stem, 14-1/8" O.L.

22611: 11" Stem, 17-1/8" O.L.

Two Light Smart-Cone

22606: 5" Stem, 11-3/8" O.L.

22609: 8" Stem, 14-1/2" O.L.

22612: 11" Stem, 17-1/2" O.L.

Smart-Cone shade & swivel dimensions: Length 4-1/2"; Width 2-7/8"

Lamps: Use 75 Watt ES-20 (GU or GZ-10 Base)

Line Voltage Halogen Reflector Lamps (lamps not included)

99003: 25° Narrow Flood 75 watt ES-20 GU-10 base

99004: 50° Wide Flood 75 watt ES-20 GU-10 base

Specify Color: (WH) White

Accessory: Close-Up Cover Plate **29010** (8" dia.) or **29011** (6" dia.)

Use with 5", 8" or 11" stem Extender models to cover recessed fixture opening.

LINE VOLTAGE SMART-CONE HALOGEN SCREW-IN LIGHTS

With a simple turn of your wrist, existing rigid fixtures or recessed down lights convert to latest lamp technology utilizing miniature line voltage halogen lamps that fit today's trend for smaller size, less obtrusive lighting.

Smart-Cone halogen lights are instantly adjustable. Easily place illumination in any direction needed.

Smart-Cone Extender units are compact. They do not require a costly low voltage transformer and are fully dimmable with a standard incandescent dimmer.

The Smart-Cone halogen lights give you precise beam control and a warm color temperature of 2750K. Use 75 watt ES-20 (aluminized) lamps; or ESD-20 (dichroic) lamps. These lamps utilize a "W" design filament for optical efficiency and long lamp life.

Smart-Cone halogen lights screw into a medium base socket and convert socket to accommodate GU or GZ-10 base lamps. The male screw in base features a built-in ratchet mechanism that prevents over tightening of lamp.

Swivelier's patented spring tension swivel rotates a full 360° and angles 90°.

The swivel socket stays put without levers or set screws. A touch of the finger puts the light in any direction you desire for maximum flexibility.
