CAST OUTDOOR SWIVEL LIGHTS

Universally adjustable lighting that illuminates any setting with Swivelier's easy to install outdoor Micro-Mini units.

Available in 1/2 NPT threaded stem, single or double light canopy style configurations.

Use for general illumination, flood or spot lighting, for accent and security where high wattage or energy efficient adjustable lighting is needed. Cast Micro-Mini outdoor units light up entrance ways, driveways, under eaves, trees, outdoor landscaping and sculptures.

Canopy style provided with 5-1/8" diameter canopy, 7/8" deep fits standard 3" or 4" outlet boxes. Unit provided with mounting strap and pre-stripped wire leads.

Sockets & canopy provided with sealing gaskets for complete weatherproofing.

To use with metal halide lamps it is necessary to add a remote mounted ballast of the appropriate wattage and voltage (ballast not included).

Micro-Mini is provided with a 4KV pulse rated 660W-600V porcelain medium base socket. Fixture operates on 120 volt to 277 volt.

Swivelier's patented spring tension swivel rotates a full 360° and angles 90°. The swivel socket stays put without levers or set screws. A touch of the finger puts the light in any direction you desire for maximum flexibility.
