CANOPY STYLE SWIVEL LIGHTS FOR INDOOR AND DAMP LOCATIONS

Universally adjustable lighting that illuminates any setting with Swivelier's easy to install canopy style units.

Available in your choice of single and double light configurations.

Use for general illumination, flood or spot lighting to accent and highlight exhibits, displays, and merchandise where high wattage or energy efficient adjustable lighting is needed.

Deluxe heavy-duty die cast metal construction with high heat 200° centigrade wiring.

5-1/8" diameter canopy, 7/8" deep fits standard 3" or 4" outlet boxes. Unit provided with mounting strap and pre-stripped wire leads.

To use with metal halide lamps it is necessary to add a remote mounted ballast of the appropriate wattage and voltage (ballast not included).

Micro-Mini is provided with a 4KV pulse rated 660W-600V porcelain medium base socket. Fixture operates on 120 volt to 277 volt.

Swivelier's patented spring tension swivel rotates a full 360° and angles 90°. The swivel socket stays put without levers or set screws. A touch of the finger puts the light in any direction you desire for maximum flexibility.
